

Emily Novak

emily.novak@example.net | Languages: English, German | Track: Simulation | Experience: 5 years

PROFESSIONAL SUMMARY

Simulation engineer with expertise in creating virtual environments for testing and validation. Skilled in physics-based modeling and software development.

EDUCATION

MSc in Mechanical Engineering, Technical University of Munich

SKILLS

Simulink | Matlab | C++ | Python | Unity | Unreal Engine | 3D Modeling | Physics Simulation | Numerical Methods | Algorithm Development | Autonomous Vehicles | Data Visualization | Analytical Thinking | Problem Solving | Team Collaboration | OpenGL | GPU Programming | Simulation Testing

EXPERIENCE

Developed high-fidelity simulation environments for testing autonomous vehicle algorithms. Implemented physics-based models to simulate real-world scenarios with high accuracy. Worked with game engines like Unity and Unreal Engine to create immersive testing platforms. Conducted extensive testing and debugging of simulation environments to ensure reliability. Proficient in Matlab, Simulink, and C++ for simulation development.
