

Liam O'Connor

liam.oconnor@example.net | Languages: English, Irish | Track: Backend | Experience: 9 years

PROFESSIONAL SUMMARY

Backend engineer with extensive experience in building cloud-based architectures and optimizing server-side performance. Specialized in distributed systems.

EDUCATION

MSc in Computer Science, University College Dublin

SKILLS

Java | Python | Go | SQL | NoSQL | Distributed Systems | Cloud Computing | AWS | Google Cloud | Docker | Kubernetes | CI/CD | Microservices | REST APIs | GraphQL | Problem Solving | Team Collaboration | System Design | Agile Methodologies | Linux

EXPERIENCE

Architected and implemented scalable microservices for high-throughput applications in the e-commerce and finance industries. Designed and optimized cloud-based systems using AWS and Google Cloud, reducing infrastructure costs by 15%. Led the migration of monolithic legacy systems to modern distributed architectures. Proficient in containerization technologies such as Docker and Kubernetes. Skilled in system design and performance tuning for large-scale systems.
