

Maya Chen

maya.chen@example.com | Languages: English, Mandarin | Track: Robotics | Experience: 7 years

PROFESSIONAL SUMMARY

Robotics engineer with experience in designing autonomous systems and integrating sensors for industrial robotics applications. Passionate about developing intelligent machines.

EDUCATION

Master's in Robotics, Carnegie Mellon University

SKILLS

C++ | ROS | Python | SLAM | Sensor Integration | Control Systems | Embedded Systems | Linux | MATLAB | OpenCV | Machine Learning | Path Planning | Robotics Simulation | Gazebo | Teamwork | Problem Solving | System Calibration | Prototyping | Agile Development | Communication | 3D Modeling

EXPERIENCE

Maya has seven years of experience in robotics engineering, specializing in the development of autonomous systems for industrial and research purposes. She has expertise in integrating sensors and control systems, with hands-on experience using ROS and SLAM algorithms. Maya has successfully led the development of autonomous navigation solutions for warehouse robotics, reducing operational costs by 25%. She is proficient in C++, Python, and MATLAB, and has a strong background in robotics simulation tools such as Gazebo.
