

Lena Harper

lena.harper@example.com | Languages: English, Spanish | Track: Backend | Experience: 7 years

PROFESSIONAL SUMMARY

Experienced backend developer with a strong foundation in server-side programming and database management. Passionate about designing scalable systems and optimizing application performance. Adept at working in cross-functional teams to deliver robust solutions.

EDUCATION

B.Sc. in Computer Science, University of Colorado

SKILLS

Java | Spring Boot | Node.js | Python | Django | SQL | PostgreSQL | MongoDB | Redis | RESTful APIs | GraphQL | Docker | Kubernetes | AWS | CI/CD pipelines | Git | Agile methodologies | Problem-solving | Team collaboration | System architecture | Performance optimization | Unit testing | Integration testing | Microservices | Event-driven architecture | Message queues | RabbitMQ | Kafka | NoSQL databases | Data modeling | Version control | Code reviews | Object-oriented programming | Critical thinking | Communication skills | Software design patterns | Scalable systems

EXPERIENCE

Lena Harper is a seasoned backend developer with over seven years of professional experience in creating and maintaining scalable, high-performance server-side applications. She is proficient in Java, Python, and Node.js, with hands-on experience in frameworks like Spring Boot and Django. Lena has a proven track record of designing and implementing RESTful APIs and GraphQL endpoints, as well as optimizing database performance using PostgreSQL and MongoDB. Her expertise extends to cloud platforms like AWS, containerization with Docker and Kubernetes, and setting up CI/CD pipelines for streamlined deployments.

In previous roles, Lena has been instrumental in migrating monolithic architectures to microservices, improving application reliability and scalability. She is skilled in event-driven architecture, utilizing tools like RabbitMQ and Kafka for asynchronous data processing. Lena is a strong advocate for clean code and best practices, regularly conducting code reviews and mentoring junior developers. Her ability to work collaboratively in Agile environments has contributed significantly to the success of cross-functional projects.

Lena graduated with a Bachelor of Science in Computer Science from the University of Colorado, where she built a solid foundation in algorithms, data structures, and software engineering principles. Fluent in both English and Spanish, she excels at communication and is committed to delivering impactful technical solutions that meet business objectives.
