

Omar Khalil

omar.khalil@example.com | Languages: English, Arabic | Track: Backend | Experience: 6 years

PROFESSIONAL SUMMARY

A software engineer with a strong background in backend development. Skilled in building scalable systems and optimizing database performance.

EDUCATION

Bachelor's in Computer Science, American University of Beirut (AUB)

SKILLS

Java | Spring Boot | REST APIs | PostgreSQL | MongoDB | Docker | Kubernetes | Microservices | Git | CI/CD | AWS | Agile Methodologies | Problem Solving | Team Collaboration | Debugging | Data Structures | Algorithms | Redis | RabbitMQ | Unit Testing

EXPERIENCE

Developed and maintained RESTful APIs for a fintech application serving over 1 million users. Improved database query performance by 20% using indexing and query optimization techniques. Deployed microservices on AWS using Docker and Kubernetes, reducing server downtime by 30%. Led a backend team of 4 engineers to deliver a major feature within tight deadlines. Tools used: Java, Spring Boot, PostgreSQL, Redis, RabbitMQ.
