

Carlos Gutierrez

carlos.gutierrez@example.com | Languages: Spanish, English | Track: Simulation | Experience: 7 years

PROFESSIONAL SUMMARY

Simulation engineer with a focus on automotive systems and virtual environments. Skilled in creating accurate simulations for testing and validation.

EDUCATION

Master's in Mechanical Engineering, University of Michigan

SKILLS

MATLAB | Simulink | Python | C++ | Autonomous Driving | Vehicle Dynamics | Sensor Modeling | Digital Twins | 3D Simulation | Unity | Gazebo | ROS | Data Analysis | Problem Solving | Team Collaboration | Project Management | Version Control | Machine Learning | Control Systems | Linux

EXPERIENCE

Developed simulation models for autonomous vehicle testing, reducing the need for physical prototypes by 40%. Created digital twins for automotive components to improve design accuracy. Worked on vehicle dynamics simulations to optimize performance and safety. Collaborated with cross-functional teams to validate sensor models in virtual environments. Tools used: MATLAB, Simulink, Python, Unity, ROS.
