

Liam Clarke

liam.clarke@example.com | Languages: English, Spanish | Track: Backend | Experience: 5 years

PROFESSIONAL SUMMARY

A backend developer with expertise in designing and implementing scalable server-side applications. Liam is passionate about clean code and optimizing performance.

EDUCATION

MSc in Software Engineering, University of Edinburgh

SKILLS

Java | Spring Boot | Hibernate | RESTful APIs | Microservices | SQL | PostgreSQL | Docker | Kubernetes | Git | Agile Methodologies | Problem-solving | Code Review | Unit Testing | Communication

EXPERIENCE

Developed and maintained backend services for an e-commerce platform, handling over 1 million daily transactions. Designed microservices architecture using Spring Boot and Docker, reducing server downtime by 20%. Implemented advanced caching mechanisms to improve application performance. Skilled in writing efficient SQL queries and performing database optimizations.
