

Carlos Martinez

carlos.martinez@example.com | Languages: English, Spanish, French | Track: Robotics | Experience: 7 years

PROFESSIONAL SUMMARY

An experienced robotics engineer specializing in autonomous systems and control algorithms. Carlos has worked on developing innovative solutions for robotic navigation and manipulation.

EDUCATION

BEng in Mechatronics, University of Barcelona

SKILLS

Python | ROS | C++ | Control Systems | SLAM | Computer Vision | Machine Learning | OpenCV | Matlab | Embedded Systems | Problem-solving | Teamwork | Critical Thinking | Linux | Time Management

EXPERIENCE

Designed and programmed control algorithms for autonomous robots in industrial environments. Developed SLAM-based navigation systems using Python and ROS, enabling accurate indoor localization. Integrated computer vision tools for object detection and manipulation tasks. Skilled in Python, C++, and hardware-software integration.
