

Carlos Martinez

carlos.martinez@example.com | Languages: Spanish, English, German | Track: Robotics | Experience: 6 years

PROFESSIONAL SUMMARY

Carlos is a robotics engineer with a passion for autonomous systems and machine learning. He has worked on various robotic applications, including navigation and sensor integration.

EDUCATION

Master's in Robotics, Technical University of Munich

SKILLS

C++ | ROS | Python | SLAM | LIDAR | Machine Learning | TensorFlow | Computer Vision | MATLAB | OpenCV | Embedded Systems | Algorithm Development | Team Leadership | Prototyping | Simulation | Sensor Fusion | Version Control | Data Analysis | Linux

EXPERIENCE

Designed and implemented SLAM algorithms for autonomous drones, achieving a 95% accuracy in real-time navigation. Integrated LIDAR and ultrasonic sensors to enhance obstacle detection. Developed machine learning models for robotic perception using TensorFlow and OpenCV. Tested and validated robotic systems in simulated and real-world environments using ROS and Gazebo. Authored technical documentation and presented findings at industry conferences.
