

Victor Schneider

victor.schneider@example.com | Languages: German, English, French | Track: Backend | Experience: 7 years

PROFESSIONAL SUMMARY

Victor is a backend developer with expertise in data processing and distributed systems. He excels at building efficient and scalable backend solutions.

EDUCATION

Master's in Computer Science, ETH Zurich

SKILLS

Python | Django | Flask | PostgreSQL | MongoDB | AWS Lambda | Redis | Docker | Kubernetes | API Development | Data Processing | System Architecture | Agile Workflows | Unit Testing | CI/CD | Version Control | Team Collaboration | Problem Solving | Jenkins | GitLab

EXPERIENCE

Engineered and optimized backend services for a high-traffic e-commerce platform, processing over 1M transactions daily. Designed and implemented a distributed data processing pipeline using Python, Flask, and AWS Lambda. Reduced system latency by 25% through advanced caching techniques with Redis. Automated deployment processes using Jenkins and GitLab CI/CD pipelines. Mentored team members in adopting best practices for efficient coding.
