

Nina Petrov

nina.petrov@example.com | Languages: Serbian, English, German | Track: Simulation | Experience: 6 years

PROFESSIONAL SUMMARY

Nina is a simulation engineer with a background in physics and expertise in modeling complex systems. She enjoys applying her analytical skills to solve engineering problems.

EDUCATION

Master's in Mechanical Engineering, University of Belgrade

SKILLS

MATLAB | Simulink | Python | C++ | ANSYS | Finite Element Analysis | Multibody Dynamics | Optimization | Physics Modeling | Control Systems | Data Analysis | Problem Solving | Team Collaboration | Linux | Git | Testing | Debugging | Algorithms | Simulation Tools | Agile Workflows

EXPERIENCE

Led the development of simulation models for automotive suspension systems using Simulink and MATLAB. Conducted finite element analysis to evaluate structural integrity and performance under various conditions. Optimized system designs, reducing weight by 15% while maintaining durability. Collaborated with cross-functional teams to test and validate simulation results in real-world scenarios. Documented findings and recommendations for product improvements.
