

Fadi Mansour

fadi.mansour@example.com | Languages: Arabic, English, French | Track: Robotics | Experience: 5 years

PROFESSIONAL SUMMARY

Fadi is a robotics software engineer with experience in designing and implementing control systems for automated machinery. He is skilled in hardware-software integration.

EDUCATION

Bachelor's in Electrical Engineering, NDU

SKILLS

C++ | Python | ROS | SLAM | Control Systems | Embedded Systems | MATLAB | OpenCV | Linux | Git | Agile Development | Algorithm Design | Electronics | Sensor Integration | Prototyping | Simulation | Team Collaboration | Problem Solving | Data Analysis | IoT

EXPERIENCE

Developed control algorithms for robotic arms using C++ and ROS, improving precision by 20%. Integrated sensors and actuators for real-time feedback in automated systems. Designed and tested embedded systems for industrial robots, ensuring high reliability. Conducted simulations in MATLAB and Python to validate designs. Worked closely with hardware teams to optimize performance and efficiency.
