

Machine Learning Engineer

Location: Berlin, Germany | Type: Full-time | Level: Mid-level | Salary: 60,000 - 80,000 EUR/year

About the Role

As a Machine Learning Engineer at inmind.ai, you will design and implement cutting-edge AI solutions for our clients. You will work closely with data scientists and software developers to deploy scalable models. This role offers an exciting opportunity to work on impactful projects in the AI domain.

Requirements

- Proficiency in Python and TensorFlow
- Strong understanding of machine learning algorithms
- Experience with data preprocessing and feature engineering
- Ability to work collaboratively in a team

Nice to Have

- Knowledge of natural language processing
- Experience with cloud platforms like AWS or GCP
- Familiarity with Docker and containerization
