

Prompt Engineer

Location: Beirut, Lebanon | Type: Full-time | Level: Mid-level | Salary: 45,000 - 65,000 USD/year

About the Role

inmind.ai is seeking a Prompt Engineer to design, test, and optimize prompts for our multi-agent AI systems. You will work closely with the AI team to craft system prompts, few-shot examples, and evaluation frameworks that maximize the accuracy and reliability of our LLM-powered talent intelligence platform. This is a unique opportunity to shape how AI agents communicate and reason in a production HR tech environment.

Requirements

- Strong understanding of LLM capabilities (GPT-4, Claude, Gemini)
- Experience designing system prompts and multi-turn conversation flows
- Proficiency in Python for prompt testing and evaluation automation
- Knowledge of RAG pipelines and retrieval-augmented prompting strategies

Nice to Have

- Experience with LangChain, LangGraph, or Google ADK
- Background in HR tech or recruitment platforms
- Familiarity with evaluation frameworks like RAGAS
