

Introduction to BMW Group Internships

Track: AI | Document Type: Overview

BMW Group offers internships in various cutting-edge technology domains, including Artificial Intelligence (AI). Interns are immersed in projects that drive innovation in automotive and logistics technologies. The AI track focuses on applying machine learning, computer vision, and natural language processing techniques to real-world challenges. Interns work alongside industry experts to contribute to ongoing developments in autonomous systems and intelligent decision-making processes. This program aims to provide hands-on experience, foster creativity, and cultivate skills that align with BMW Group's vision for the future of mobility. Internships are based in Munich, offering exposure to a world-class corporate environment.
