

Expectations for Frontend Interns

Track: Frontend | Document Type: Expectations

Frontend interns at BMW Group are expected to create user-centric interfaces for web and mobile applications. The role involves translating design concepts into responsive, interactive, and accessible UI elements using HTML, CSS, and JavaScript frameworks such as React and Angular. Interns should prioritize user experience while adhering to BMW Group's design guidelines. Problem-solving skills are crucial for debugging and optimizing code. Collaboration with backend developers and UX/UI teams is essential for seamless integration and project success. BMW Group values innovation and encourages interns to suggest improvements and contribute fresh ideas. A proactive attitude and attention to detail are key for excelling in this track.
