

Logistical Details for Munich Internships

Track: Robotics | Document Type: Logistics

Internships in Robotics at BMW Group's Munich headquarters provide access to state-of-the-art facilities and cutting-edge research environments. Interns are required to work on-site for most projects, ensuring close collaboration with teams and access to hardware labs. Assistance with visa processing is available for international candidates. Accommodation is not provided, but interns can access resources for finding housing in Munich. The internship duration typically spans 6 months with flexible start dates. Interns receive competitive monthly stipends to cover living expenses. The program includes opportunities for networking, attending workshops, and showcasing project results to senior BMW Group representatives.
