

Overview of Frontend Internship Program

Track: Frontend | Document Type: Overview

BMW Group's Frontend internship program focuses on creating advanced user interfaces and enhancing digital experiences for customers and employees. Interns are involved in projects that range from web-based applications to mobile platforms, emphasizing responsive design and accessibility. The program encourages creativity and innovation, allowing interns to experiment with new ideas and technologies. Interns collaborate with designers, backend developers, and product managers to deliver cohesive solutions. This track offers exposure to the latest frontend frameworks and tools, fostering skills that align with BMW Group's commitment to excellence in technology and user experience.
