

Expectations for AI Interns

Track: AI | Document Type: Expectations

AI interns at BMW Group are expected to contribute to projects that enhance decision-making and automation processes. Interns should have a strong foundation in machine learning concepts and experience with frameworks like TensorFlow or PyTorch. Creativity and problem-solving skills are crucial for developing innovative solutions. Interns must demonstrate proficiency in handling large datasets and deploying models to production environments. Collaboration with cross-functional teams is essential for integrating AI solutions into broader systems. BMW Group encourages interns to present their findings and propose new approaches, fostering a culture of innovation and continuous improvement.
