

Logistics for Simulation Internships

Track: Simulation | Document Type: Logistics

Simulation internships at BMW Group are conducted at the Munich headquarters, providing access to advanced tools and collaborative spaces. Interns work onsite, ensuring close engagement with mentors and teams. Visa support is available for international candidates. While housing is not provided, BMW Group offers resources to assist interns in finding accommodation in Munich. The program typically lasts 6 months, with flexible start dates. Interns receive competitive stipends to cover living expenses. The internship includes opportunities to attend workshops, participate in team-building activities, and present project outcomes to senior management. Munich's vibrant technology scene enhances the internship experience.
